ABOUT ME

I'm a front-end developer based in Toronto. I have a passion for creating web applications that are great to look at, interactive, and efficiently functional. I'm currently experimenting with incorporating sprite animations in my projects. When I'm not in front of a computer, I can be found organizing events and herding cats ... I mean people for the tabletop gaming community in Toronto.

WORK EXPERIENCE

Precima

BI Reporting Developer (co-op)
May - December 2015
